SOUTH FLORIDA ELEVATED

THE FORT LAUDERDALE NEIGHBORHOOD GUIDE · 2026 EDITION

Where to buy in Fort Lauderdale, neighborhood by neighborhood.

Twelve Fort Lauderdale neighborhoods, from Las Olas Isles to the Galt Mile, each with a sourced median price, a walk score, the school picture, and the flood exposure that decides your insurance bill.

12	$400,000	$321	$1,100

How to use this guide

Fort Lauderdale is not one market. East of Federal Highway the buyers are paying for trees, dockage and a short walk to Las Olas. Downtown and Flagler Village are the condominium answer, and Downtown is the slowest market here at 162 median days. South of the New River, Croissant Park and Tarpon River sell houses at the lowest price per foot in the guide. Almost every address carries serious flood and wind exposure, so the insurance quote belongs in the first conversation, not the last.

$605K	$341	$5.2M	162 days
FORT LAUDERDALE MEDIAN	TARPON RIVER $/SQ FT	LAS OLAS ISLES MEDIAN	DOWNTOWN DAYS ON MARKET

START WITH HOW YOU GET AROUND

Downtown scores 90 for walking, Flagler Village 89 and Colee Hammock 86, and Brightline puts intercity rail at 101 NW 2nd Avenue. Las Olas Isles is 38, so dockage and walkability are a trade, not a bundle.

THEN CONFIRM THE SCHOOL ASSIGNMENT

Broward County Public Schools assigns by home address, and a magnet program is not a boundary assignment. Victoria Park's 9/10 elementary is a Montessori magnet. Confirm the assigned school for the exact address before you write an offer.

THEN PRICE THE INSURANCE

Broward's average homeowners premium is $6,136 with wind coverage, and flood is always a separate policy. Projected severe flood exposure here runs from 56% of properties in Colee Hammock to 99% in Las Olas Isles. Get the quote on the exact address.

THEN READ THE BUILDING OR THE PERMIT FILE

Condominiums need the budget, the reserve study and any pending special assessment. Houses need the permit history, because decades of additions are common in Victoria Park, Poinsettia Heights and Croissant Park.

AND WEIGHT THE SAMPLE SIZE

Nine closings in Las Olas Isles is not a market, and Flagler Village's 14 closings produced a 60% median jump with a 17% drop in price per foot. Where the sample is thin, the note on the page says so.

Where the numbers come from

Every price and price per square foot is a median for all home types from the Redfin market page for that area, in a three-month window ending September 2026. Flood figures are First Street projections as shown on Redfin. Walk, Transit and Bike scores come from Walk Score. Each page number in the text points to a numbered source in the back of this guide, so you can check any figure yourself.

Fort Lauderdale neighborhoods at a glance

Median sale price and median price per square foot, all home types, Redfin, three months ending September 2026. Sorted by price per square foot, lowest first, because that is the number that tells you how much space your budget actually buys.

NEIGHBORHOOD	MEDIAN	$/SQ FT	WALK	FLOOD	CHARACTER
Colee Hammock	$995K	$321	86	Major	Historic houses on the New River, 73-day sales
Tarpon River	$615K	$341	50	Moderate	Between downtown and the airport, and near the bottom price per foot
Croissant Park	$645K	$360	55	Moderate	The established grid south of the New River
Galt Mile	$400K	$367	70	Moderate	Beachfront condos, 67 sales and the lowest median price
Flagler Village	$473K	$381	89	Moderate	Top of Walk Score's city ranking, on a 14-sale sample
Victoria Park	$900K	$445	75	Major	The deepest market inside the city, walkable and close to Las Olas
Downtown Fort Lauderdale	$575K	$461	90	Major	The walkable condo core, and the slowest market here
Poinsettia Heights	$717K	$482	58	Moderate	Between the beach and Federal, 98% flood exposure
Sailboat Bend	$473K	$490	69	Moderate	Historic cottages and townhouses on the New River
Rio Vista	$2.3M	$744	54	Major	Tree canopy, deep-water canals and a 13-sale sample
Coral Ridge	$2.0M	$754	57	Major	A 10/10 elementary, a country club grid and 40% price growth
Las Olas Isles	$5.2M	$1,100	38	Extreme	Finger islands, dock space and the highest price per foot

Walk Score is the 0–100 walkability score for the area as reported by Redfin or Walk Score. Flood is First Street's projected risk label over 30 years as shown on the Redfin page for that area. Neither is a FEMA zone determination; check the flood map for the exact address.

01 Victoria Park

The deepest market inside the city, walkable and close to Las Olas

Victoria Park is the neighborhood buyers land on when they want a house or a townhouse within walking distance of Las Olas and downtown without paying Las Olas Isles money. It is also the second-deepest market in this guide: 52 closings in three months, behind only Galt Mile's 67 and well ahead of every other owner-occupied neighborhood here. The housing runs from 1940s cottages to new townhouses on a compact grid just north of downtown.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$900K	$445	lll days
-1.9% YoY	-2.3% YoY	52 sales

All home types, Redfin, three months ending September 2026. The steadiest reading in this guide: both the median and the price per foot moved about 2% year over year on 52 closings, which is a large enough sample to trust. [1]

BUYERS WHO WANT TO WALK TO LAS OLAS AND DOWNTOWN

FAMILIES WHO WANT A 9/10 ELEMENTARY INSIDE THE NEIGHBORHOOD

BUYERS WHO WANT A RESALE MARKET DEEP ENOUGH TO PRICE CONFIDENTLY

HOUSING

Single-family houses from the early postwar decades on small lots, townhouses built since the 2000s, and a growing number of new-construction houses that replace teardowns. Condominiums are a minority of the stock.

GETTING AROUND · WALK SCORE 75

Walk Score rates Victoria Park 75 ("Very Walkable"), with a Transit Score of 40 and a Bike Score of 59. It is the seventh most walkable neighborhood in the city on Walk Score's ranking, and downtown, Las Olas and the beach are all short drives.

SCHOOLS AND PARKS

Redfin lists Virginia Shuman Young Elementary (PreK–5, GreatSchools 9/10) inside the neighborhood. The building is a Montessori magnet, so admission is not the same as a boundary assignment. Confirm the assigned school for the exact address with Broward County Public Schools.

FLOOD RISK · MAJOR

94% of Victoria Park properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating. The city is rebuilding the drainage here: a project started January 5, 2026 that adds 43,000 feet of stormwater pipe, 360 drainage structures and a new pump station east of Northeast 20th Avenue and Northeast 7th Street, scheduled to finish in early 2028.

HONEST TRADE-OFFS

- Homes averaged about 6% under list and 36% of listings in the window took a price cut, so the market rewards a patient, well-priced offer rather than a full-price rush.
- The stormwater construction means lane closures and full street closures through 2028 on the blocks being rebuilt. Ask which phase your street falls in before you buy.
- Lot sizes are small and many houses have been added onto over decades. Order the permit history, not just an inspection.

02 Las Olas Isles

Finger islands, dock space and the highest price per foot

Las Olas Isles is the group of finger islands between Las Olas Boulevard and the New River, where much of the housing sits on a canal with dock space, which is why boat owners ask about it first. It is the most expensive address in this guide at $1.1K per square foot, and a thin sample: nine closings in three months. Read those nine sales as nine individual houses, not as a market.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$5.2M	$1,100	100 days
+203.3% YoY	+130.4% YoY	9 sales

All home types, Redfin, three months ending September 2026. Nine sales, up from two in the same window last year. A 203% jump in the median and 130% in price per foot is what happens when the mix swings from older houses to new waterfront builds, not evidence that every house tripled. [2]

BUYERS WHO NEED DOCKAGE BEHIND THE HOUSE

BUYERS WHO WANT A DEEP-WATER ADDRESS MINUTES FROM THE INLET

BUYERS WHO WILL RENOVATE OR BUILD AND CAN WAIT OUT A SLOW RESALE

HOUSING

Detached single-family houses on the islands, ranging from older ranch houses to recent waterfront builds. Condominiums and townhouses are effectively absent, and the house you buy is generally the house you renovate.

GETTING AROUND · WALK SCORE 38

Walk Score gives Las Olas Isles a 38 ("Car-Dependent"), a Transit Score of 26 and a Bike Score of 41 ("Somewhat Bikeable"). The islands are residential and the bridges funnel every trip onto Las Olas Boulevard or Sunrise Boulevard.

SCHOOLS AND PARKS

Redfin's Las Olas Isles page publishes no elementary school inside the neighborhood boundary. School-age buyers should check the assigned school for the exact address with Broward County Public Schools before making an offer on a house.

FLOOD RISK · EXTREME

99% of Las Olas Isles properties are projected to face severe flood risk over 30 years, the highest share in this guide, and 100% carry an extreme wind rating. On a finger island, flood elevation and dock height matter as much as the floor plan.

HONEST TRADE-OFFS

- Nine closings is not a market. Ask for every sale on your island in the last twelve months before you accept the neighborhood median as a comparable.
- Homes averaged about 9% under list in the window, the second-widest discount in this guide behind Colee Hammock, and 21% of listings took a price cut. Asking prices on the isles run ahead of what buyers pay.
- Flood and wind coverage on an island property is the largest line item after the mortgage, and flood is always a separate policy.

03 Rio Vista

Tree canopy, deep-water canals and a 13-sale sample

Rio Vista is the old waterfront neighborhood south of the New River, laid out around wide streets and a heavy tree canopy, with canals that reach deep-water dockage. It reads as the quieter, more residential counterpart to Las Olas Isles, and the houses are generally older and on larger lots. Thirteen closings in the window make the median a direction, not a target.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$2.3M	$744	112 days
+19.1% YoY	+11.4% YoY	13 sales

All home types, Redfin, three months ending September 2026. Thirteen sales, with the median up 19.1% and price per foot up 11.4% together. When both move the same direction, the increase is closer to real than a mix shift. [3]

BUYERS WHO WANT A HOUSE WITH DOCKAGE AND A MATURE CANOPY

BUYERS WHO PREFER A RESIDENTIAL GRID OVER A CONDO TOWER

FAMILIES WHO WANT TO BE CLOSE TO DOWNTOWN WITHOUT LIVING IN IT

HOUSING

Single-family houses on generous lots, from older single-story homes to recent builds on cleared lots, with a small number of townhouses near the neighborhood edges. There is no meaningful condominium stock.

GETTING AROUND · WALK SCORE 54

Walk Score rates Rio Vista 54 ("Somewhat Walkable"), with a Transit Score of 38 and a Bike Score of 58. The neighborhood is a short drive from downtown and the beach, and the riverfront parks are walkable from most of it.

SCHOOLS AND PARKS

Redfin's Rio Vista page lists no elementary school inside the neighborhood boundary, so school-age buyers should confirm the assigned school for the exact address with Broward County Public Schools rather than assume a nearby campus applies.

FLOOD RISK · MAJOR

77% of Rio Vista properties are projected to face severe flood risk over 30 years, the third-lowest share in this guide behind Colee Hammock and Galt Mile, though 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- 47% of listings in the window took a price cut, the highest share in this guide. Sellers here are testing the market, and buyers have room to negotiate.
- Thirteen sales spread across houses of very different size and dockage. Two canal-front closings can move the median by six figures.
- Older houses on the canals carry real seawall, dock and pool-deck costs. Have the seawall inspected, not just the house.

04 Coral Ridge

A 10/10 elementary, a country club grid and 40% price growth

Coral Ridge sits north of Sunrise Boulevard around the Coral Ridge Country Club, a grid of mid-century houses and newer builds a short ride from the beach. It posted the strongest price growth of any neighborhood here that also closed at least 30 homes, at 40.6% year over year, and it is home to the highest-rated elementary school in this guide. It is also the second-slowest market here after Downtown, at 127 days.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$2.0M	$754	127 days
+40.6% YoY	+21.1% YoY	33 sales

All home types, Redfin, three months ending September 2026. Both the median and the price per foot rose sharply on 33 sales, so this is the one high-end neighborhood here where the increase is not obviously a mix effect. [4]

FAMILIES PRIORITIZING THE HIGHEST PUBLIC ELEMENTARY RATING IN THIS GUIDE

BUYERS WHO WANT A HOUSE AND A YARD NEAR THE BEACH

BUYERS WHO WANT A COUNTRY CLUB AND GOLF NEARBY

HOUSING

Single-family houses from the mid-century decades alongside newer construction on the interior streets, with a limited number of condominiums and townhouses along the commercial edges.

GETTING AROUND · WALK SCORE 57

Walk Score rates Coral Ridge 57 ("Somewhat Walkable"), with a Transit Score of 37 and a Bike Score of 50 ("Somewhat Bikeable"). The commercial strip on Federal Highway is walkable; the residential blocks mostly are not.

SCHOOLS AND PARKS

Redfin lists Bayview Elementary (K–5, GreatSchools 10/10) inside the neighborhood, the highest rating published for any school in this guide. Enrollment still follows the boundary for the exact address, so confirm it with Broward County Public Schools.

FLOOD RISK · MAJOR

92% of Coral Ridge properties are projected to face severe flood risk over 30 years, with 100% at extreme wind risk. Elevation and drainage vary block by block near the water, so check the FEMA map for the address.

HONEST TRADE-OFFS

- Homes averaged about 7% under list and 30.8% of listings took a price cut, while no sale in the window closed above list. The 40% median increase is a seller's memory, not a buyer's reality at the negotiating table.
- At 127 days on market it is slower than every neighborhood here except Downtown. Price to sell, or plan on carrying it.
- Country club membership is separate from the address and is not part of any purchase price. Ask the club directly about dues and waitlists.

05 Downtown Fort Lauderdale

The walkable condo core, and the slowest market here

Downtown Fort Lauderdale is the condo core around Las Olas Boulevard, the New River and the Brightline station. It walks better than any other area in this guide, at a Walk Score of 90, and it has the strongest bike score here at 83. It is also the slowest market in this guide: 162 median days on market, six days longer than a year earlier, on 23 closings. Buyers who want to walk to dinner and a train will like it. Sellers should plan for a long listing.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$575K	$461	162 days
+2.6% YoY	+11.2% YoY	23 sales

All home types, Redfin, three months ending September 2026. Closings fell 26.7% year over year while price per foot rose 11.2%, which points to fewer, larger or newer units trading rather than a broad move up. [5]

BUYERS WHO WANT TO WALK TO RESTAURANTS, OFFICES AND THE TRAIN

COMMUTER BUYERS WHO WANT BRIGHTLINE WITHOUT A CAR COMMUTE

INVESTORS WHO WANT A DEEP RENTAL POOL DOWNTOWN

HOUSING

Almost entirely condominiums, in towers and in smaller buildings closer to the river, plus a small stock of lofts and townhouses. Detached houses are effectively absent inside the core.

GETTING AROUND · WALK SCORE 90

Redfin reports a Walk Score of 90 ("Very Walkable") for Downtown, a Transit Score of 56 and a Bike Score of 83 ("Very Bikeable"), the highest walk figure of the twelve areas in this guide. Walk Score's own Fort Lauderdale ranking lists Flagler Village first at 89 and does not publish a separate Downtown entry. Brightline's Fort Lauderdale station is at 101 NW 2nd Avenue, and the city lists Broward County Transit, Tri-Rail, Amtrak, the free LauderGO! Community Shuttle and the LauderGO! Water Trolley across the New River among the options here.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the downtown boundary and lists only Broward County Acceleration Academies (grades 8–12, GreatSchools 2/10) for the middle and high grades. Families with young children should check the assigned school for the address before buying.

FLOOD RISK · MAJOR

88% of Downtown properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- At 162 median days and a Compete Score of 10 out of 100, this is among the least competitive markets in the guide, tied with Flagler Village on the score. Buyers should expect to negotiate and sellers should expect to wait.
- 38.1% of listings took a price cut in the window, the second-highest share here. Initial asking prices are running ahead of closings.
- Tower supply is the long-term risk. Older buildings also carry milestone inspection and reserve requirements under Florida law, so read the association documents and the reserve study before you buy.

06 Flagler Village

Top of Walk Score's city ranking, on a 14-sale sample

Flagler Village is the arts-and-condo district north of downtown, and Walk Score ranks it first among Fort Lauderdale neighborhoods at 89, ahead of Colee Hammock and Victoria Park. Most of the stock is mid-rise and high-rise condominium buildings rather than houses or townhouses. Fourteen closings in the window make the median fragile.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$473K	$381	106 days
+60.3% YoY	-17.4% YoY	14 sales

All home types, Redfin, three months ending September 2026. The median rose 60.3% while price per foot fell 17.4% on 14 sales. That divergence is a change in which units sold, not a neighborhood that got both more and less expensive. [6]

BUYERS WHO WANT THE TOP WALK SCORE RANKING IN THE CITY

BUYERS COMPARING PRICE PER FOOT AGAINST DOWNTOWN AND VICTORIA PARK

BUYERS WHO WANT A NEWER BUILDING RATHER THAN A RENOVATION PROJECT

HOUSING

Condominiums in mid-rise and high-rise buildings, most of them recent construction, plus a small number of older single-family houses and duplexes on the western blocks.

GETTING AROUND · WALK SCORE 89

Walk Score rates Flagler Village 89 ("Very Walkable") with a Transit Score of 56 ("Good Transit") and a Bike Score of 64. It holds first place in Walk Score's ranking of Fort Lauderdale neighborhoods, ahead of Colee Hammock at 86 and Victoria Park at 75.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the Flagler Village boundary. Buyers with school-age children should confirm the assigned school for the exact address with Broward County Public Schools, which runs its own address lookup.

FLOOD RISK · MODERATE

90% of Flagler Village properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- Fourteen closings. The 60% median jump and 17% per-foot drop are the same fact seen two ways, so compare price per foot in the specific building you are considering.
- At 106 days on market and a Compete Score of 10, listings sit. Ask how long your unit has been listed and what the seller has already turned down.
- New supply is the resale risk. A newer tower down the street resets what buyers will pay for an older one, and rental caps in a building change what you can do with the unit.

07 Colee Hammock

Historic houses on the New River, 73-day sales

Colee Hammock is the small historic neighborhood on the north bank of the New River just east of downtown, a few blocks of Mediterranean Revival and Colonial Revival houses under old trees. It has the second-highest walk score in the city at 86 and the lowest flood exposure in this guide, and it sold faster than any neighborhood here at 73 median days. The catch is the sample: ten closings.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$995K	$321	73 days
+107.2% YoY	-30.3% YoY	10 sales

All home types, Redfin, three months ending September 2026. Ten sales. The median doubled while price per foot fell 30.3%, which is what a shift toward larger houses on bigger lots looks like in a neighborhood this small. [7]

BUYERS WHO WANT A HISTORIC HOUSE WALKABLE TO LAS OLAS

BUYERS PRIORITIZING LOWER FLOOD EXPOSURE THAN THE ISLANDS

BUYERS WHO VALUE A SMALL, QUIET STREET GRID DOWNTOWN

HOUSING

Detached single-family houses, many of them historic, plus a handful of small condominium buildings and townhouses along the neighborhood edges. Lots are small and mature trees dominate the streets.

GETTING AROUND · WALK SCORE 86

Walk Score rates Colee Hammock 86 ("Very Walkable"), with a Transit Score of 41 and a Bike Score of 53. Las Olas Boulevard and the Riverwalk are within walking distance, and downtown is a short ride.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the Colee Hammock boundary. School-age buyers should check the assigned school for the exact address with Broward County Public Schools; nearby Victoria Park is where Redfin lists a rated elementary.

FLOOD RISK · MAJOR

56% of Colee Hammock properties are projected to face severe flood risk over 30 years, the lowest share of any neighborhood in this guide, though 100% still carry an extreme wind rating.

HONEST TRADE-OFFS

- Homes averaged about 12% under list, the widest gap in this guide, and no sale closed above list. The headline median here is not a number sellers are getting.
- Ten closings on houses of very different size. A single restored riverfront house can carry the median for a quarter.
- Historic houses mean historic systems. Roof, electrical, plumbing and window condition drive both the inspection report and the insurance quote.

08 Galt Mile

Beachfront condos, 67 sales and the lowest median price

Galt Mile is the stretch of oceanfront and Intracoastal condominium towers along A1A at the northern end of the city. It is the deepest condo market in this guide with 67 closings and the lowest median price at $400K, because the low end of the tower stock is what clears here. Prices fell 17.5% year over year, as much as any neighborhood in this guide.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$400K	$367	122 days
-17.5% YoY	-6.9% YoY	67 sales

All home types, Redfin, three months ending September 2026. Sixty-seven closings, the deepest sample in this guide, with the median down 17.5% and price per foot down 6.9%. On this volume the decline is real, not noise. [8]

BUYERS WHO WANT AN OCEANFRONT BUILDING AT THE LOWEST ENTRY PRICE

BUYERS WHO WANT THE DEEPEST CONDO RESALE MARKET IN THE CITY

SEASONAL OWNERS WHO WANT A DOORMAN BUILDING AND A BEACH

HOUSING

High-rise condominiums, many of them built decades ago and some newer, with the beach and the Intracoastal on either side of the strip. Each building sets its own rental and occupancy rules, so read the association documents before you compare two units.

GETTING AROUND · WALK SCORE 70

Walk Score rates Galt Mile 70 ("Very Walkable"), with a Transit Score of 40 and a Bike Score of 62. The beach, the shops along A1A and the restaurants on the strip are walkable; everything west of the Intracoastal needs a car.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the Galt Mile boundary. Families should confirm the assigned school for the exact address with Broward County Public Schools, since attendance areas near the beach corridor do not follow neighborhood lines.

FLOOD RISK · MODERATE

75% of Galt Mile properties are projected to face severe flood risk over 30 years, with 100% at extreme wind risk. Oceanfront buildings face the wind and salt exposure that come with the address.

HONEST TRADE-OFFS

- Prices have been falling for a year in a market with 67 closings to prove it. That is leverage for a buyer and a real question for anyone buying on a short hold.
- Older oceanfront towers carry milestone inspection and structural reserve requirements under Florida law. The reserve study and any pending assessment matter more than the list price.
- The lowest median in this guide reflects the smallest and oldest units on the beach. Compare price per foot and the monthly maintenance before you compare headline prices.

09 Sailboat Bend

Historic cottages and townhouses on the New River

Sailboat Bend is the historic district on the south bank of the New River west of downtown, a mix of 1920s cottages and newer townhouses within walking distance of the Broward Center and the Riverwalk. It has the best transit score of any residential neighborhood here outside Flagler Village and downtown, at 51. Eight closings in three months make it the thinnest sample in this guide.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$473K	$490	88 days
+26.1% YoY	+18.6% YoY	8 sales

All home types, Redfin, three months ending September 2026. Eight sales, down from 16 in the same window last year. Both the median and the price per foot rose, but on this volume either could move double digits from one atypical closing. [9]

BUYERS WHO WANT A HISTORIC COTTAGE NEAR DOWNTOWN

BUYERS WHO WANT WALKABILITY WITHOUT A HIGH-RISE

BUYERS COMPARING A TOWNHOUSE AGAINST A DOWNTOWN CONDO

HOUSING

Single-family cottages and bungalows alongside townhouse projects and newer infill houses, with building size and condition varying block to block.

GETTING AROUND · WALK SCORE 69

Walk Score rates Sailboat Bend 69 ("Somewhat Walkable") with a Transit Score of 51 ("Good Transit") and a Bike Score of 62. The Riverwalk and downtown are walkable, and the LauderGO! Water Trolley crosses the New River for free.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the Sailboat Bend boundary. Buyers with children should confirm the assigned school for the exact address with Broward County Public Schools before writing an offer.

FLOOD RISK · MODERATE

94% of Sailboat Bend properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating. The neighborhood fronts the New River, so drainage and elevation vary by block.

HONEST TRADE-OFFS

- Eight closings is the smallest sample in this guide. Any neighborhood median from eight sales deserves six months of your own comparables.
- Historic cottages come with the permits that were and were not pulled. Order the permit history and expect roof, electrical and plumbing findings.
- Townhouses here compete directly with downtown condos on price. Compare the monthly association cost, not just the sale price.

10 Tarpon River

Between downtown and the airport, and near the bottom price per foot

Tarpon River runs along the river south of downtown toward the airport, a mix of older houses, duplexes and newer townhouses. It has the second-lowest price per square foot in this guide at $341, behind only Colee Hammock, and it is a house market rather than a condo one. Prices also fell 17.5% year over year, and the sample is real at 30 closings.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$615K	$341	107 days
-17.5% YoY	-5.3% YoY	30 sales

All home types, Redfin, three months ending September 2026. Thirty closings, with the median down 17.5% and price per foot down 5.3%. The bigger drop in the median than in the per-foot figure points to smaller units selling. [10]

BUYERS WHO WANT MORE HOUSE FOR THE MONEY NEAR DOWNTOWN

BUYERS WHO WANT A HOUSE OR TOWNHOUSE RATHER THAN A CONDO

BUYERS WHO VALUE AIRPORT PROXIMITY

HOUSING

Single-family houses, duplexes and small multifamily buildings, plus townhouse projects near the river. Condition ranges from fully renovated to original.

GETTING AROUND · WALK SCORE 50

Walk Score rates Tarpon River 50 ("Somewhat Walkable"), with a Transit Score of 44 and a Bike Score of 62. Downtown is a short drive or ride, and Fort Lauderdale-Hollywood International Airport is minutes south.

SCHOOLS AND PARKS

Redfin publishes no elementary school inside the Tarpon River boundary. Buyers with school-age children should confirm the assigned school for the exact address with Broward County Public Schools.

FLOOD RISK · MODERATE

96% of Tarpon River properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- Prices fell 17.5% year over year on 30 sales. That is bargaining room for a buyer and a warning for anyone buying to resell in two years.
- Homes averaged about 4% under list with a 95.9% sale-to-list ratio, so sellers here are holding price. A low offer needs a reason beyond the neighborhood median.
- Flight paths and highway noise vary street by street with the airport this close. Visit at different times of day before you commit.

11 Poinsettia Heights

Between the beach and Federal, 98% flood exposure

Poinsettia Heights is the grid of houses and small buildings east of Federal Highway and a few minutes inland from the beach, north of Sunrise Boulevard. It is one of the more affordable places in this guide to buy a detached house, at a $717K median, and closings nearly tripled year over year from 11 to 30. It also carries 98% projected severe flood exposure, which is the number to price before the house.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$717K	$482	88 days
+5.8% YoY	-16.2% YoY	30 sales

All home types, Redfin, three months ending September 2026. Closings rose from 11 to 30 year over year while price per foot fell 16.2%. More, smaller or less renovated houses sold in this window than last year. [11]

BUYERS WHO WANT A DETACHED HOUSE NEAR THE BEACH

BUYERS WHO WANT TO BE BETWEEN THE BEACH AND DOWNTOWN

BUYERS WHO WILL PRICE FLOOD MITIGATION INTO THE BUDGET

HOUSING

Single-family houses on small lots, with duplexes and a limited number of small condominium buildings on the commercial edges. Condition varies from renovated to original.

GETTING AROUND · WALK SCORE 58

Walk Score rates Poinsettia Heights 58 ("Somewhat Walkable"), with a Transit Score of 34 and a Bike Score of 60. Federal Highway carries the buses; the beach is a short drive east.

SCHOOLS AND PARKS

Redfin lists Bennett Elementary (PreK–5, GreatSchools 5/10) and Sunrise Middle (grades 6–8, 6/10) for the area. Buyers comparing schools usually cross-shop Coral Ridge, where Redfin lists Bayview Elementary at 10/10.

FLOOD RISK · MODERATE

98% of Poinsettia Heights properties are projected to face severe flood risk over 30 years, the second-highest share in this guide behind Las Olas Isles, and 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- A 5/10 elementary and a 6/10 middle school are the published ratings. If school quality is the reason for the move, this is not the neighborhood that answers it.
- 98% projected severe flood exposure means flood insurance is not optional and quotes vary by elevation and renovation. Get the quote before you make an offer, not after.
- Price per foot fell 16.2% while the median rose. Compare houses of similar size rather than trusting either figure alone.

12 Croissant Park

The established grid south of the New River

Croissant Park is the established residential neighborhood south of the New River, a compact grid of houses and duplexes with a city park and pool at its center. It is one of the lowest-priced ways into a detached house in this guide, at $360 per square foot, and it sold faster than most of the guide at 78 median days. The elementary school inside it is rated 7/10.

MEDIAN SALE PRICE	MEDIAN $/SQ FT	DAYS ON MARKET
$645K	$360	78 days
+12.9% YoY	-20.0% YoY	15 sales

All home types, Redfin, three months ending September 2026. Fifteen closings, with the median up 12.9% while price per foot fell 20.0%. The houses that sold in this window were larger or newer than last year's. [12]

BUYERS WHO WANT A DETACHED HOUSE NEAR THE BOTTOM OF THE PRICE RANGE

BUYERS WHO WANT A RATED ELEMENTARY INSIDE THE NEIGHBORHOOD

BUYERS WHO WANT TO BE CLOSE TO DOWNTOWN AND THE AIRPORT

HOUSING

Single-family houses, duplexes and small apartment buildings, with new construction appearing on infill lots. Lot sizes are modest and the street grid is compact.

GETTING AROUND · WALK SCORE 55

Walk Score rates Croissant Park 55 ("Somewhat Walkable"), with a Transit Score of 39 and a Bike Score of 64. Downtown is a short drive north across the river, and the airport is minutes south.

SCHOOLS AND PARKS

Redfin lists Croissant Park Elementary (PreK–5, GreatSchools 7/10) inside the neighborhood. Confirm the assigned school for the exact address with Broward County Public Schools, since attendance areas do not follow neighborhood lines exactly.

FLOOD RISK · MODERATE

93% of Croissant Park properties are projected to face severe flood risk over 30 years, and 100% carry an extreme wind rating.

HONEST TRADE-OFFS

- Older houses mean roof, plumbing and electrical work, and additions that may or may not have been permitted. Order the permit history.
- Fifteen closings, so the median and the per-foot figure disagree by 33 points. Trust neither until you have your own comparables.
- Noise from the airport, the highway and the rail corridor is part of the address on the southern and western blocks.

Questions buyers ask in Fort Lauderdale

What is the best neighborhood in Fort Lauderdale to buy a home in?

There is no single best one. Victoria Park suits buyers who want a house or townhouse they can walk to Las Olas and downtown, and it is the second-deepest resale market in this guide at 52 closings in three months. Coral Ridge and Rio Vista suit buyers who want trees, larger lots and the east-side location. Flagler Village and Downtown are the condominium and walkability answers. Las Olas Isles is the dockage answer at $1.1K per square foot. The right choice depends on your commute, whether you need a school assignment, and how much flood and wind insurance you are willing to carry.

How much does a home cost in Fort Lauderdale right now?

Redfin's October 2026 page, covering the three months ending September 2026, puts the citywide median sale price for all home types at $605K, up 14.1% year over year, on 851 sales and 104 median days on market. By neighborhood in the same window, the median ran from $400K in the Galt Mile to $5.2M in Las Olas Isles, with Victoria Park at $900K, Flagler Village at $473K and Downtown at $575K. Those are medians, so a condo and a house in the same area can sit far from the number.

Las Olas Isles or Victoria Park for a house?

They answer different questions. Las Olas Isles is about dockage: canal-front houses on the finger islands at a median of $5.2M and $1.1K per square foot, with nine closings in the window, which is a thin sample. Victoria Park is about walkability and market depth: a $900K median at $445 per square foot on 52 closings, with a Walk Score of 75. If you need water behind the house, the isles are the only answer here. If you want to walk to dinner and price your resale against many comparable sales, Victoria Park is the safer read.

Do I need flood insurance in Fort Lauderdale?

Flood is a separate policy on every homeowners form and is not included in any county average premium. Projected severe flood exposure over 30 years in the neighborhoods covered here runs from 56% of properties in Colee Hammock to 99% in Las Olas Isles, and every area in this guide carries 100% extreme wind exposure. The city is also rebuilding drainage in places: the Victoria Park stormwater project adds 43,000 feet of pipe and a new pump station between January 2026 and early 2028. Check the FEMA flood map for the exact address and get a flood quote before you remove your inspection contingency.

YOUR NEXT STEP

Want this narrowed to your budget and your block?

Tell me which two or three neighborhoods here you are weighing and I will send the building-by-building version, with the condo documents to request and the questions to ask before an offer.

Questions buyers ask in Fort Lauderdale, continued

Which Fort Lauderdale neighborhoods can I live in without a car?

Downtown Fort Lauderdale scores 90 for walking with a Transit Score of 56 and a Bike Score of 83, and Brightline's station at 101 NW 2nd Avenue puts intercity rail inside the neighborhood. Flagler Village scores 89 and Colee Hammock 86, both Very Walkable. Victoria Park is 75. Las Olas Isles drops to 38, which is car-dependent, and Coral Ridge, Rio Vista and Croissant Park sit in the 50s. Broward County Transit, Tri-Rail, Amtrak and the LauderGO! shuttle and water trolley fill in the gaps downtown.

What does homeowners insurance cost in Broward County?

Florida's Office of Insurance Regulation reports an average Broward County homeowners premium of $6,136 a year with wind coverage and $3,008 without it, using policy data as of March 31, 2026. The same report puts the average condominium unit owner policy at $1,816 with wind coverage and $1,317 without. Those are averages across every insured property in the county, not a quote: roof age, wind mitigation features, deductibles and rebuild cost move the number more than the ZIP code does.

Should I buy in a neighborhood where the median price fell?

A falling median is not automatically a bargain, and a rising one is not automatically a warning. Tarpon River's median fell 17.5% and Galt Mile's fell 17.5% in the same window, while Flagler Village's median rose 60.3% even as its price per square foot dropped 17.4%. When the median and the per-foot figure disagree that sharply, the mix of what sold changed. Ask for the last six months of closed comparables in the specific building or block, then decide.

How much are HOA dues in a Fort Lauderdale condo?

There is no reliable published range by neighborhood, so this guide does not quote one. Instead, ask each association for its current budget, its reserve study or structural integrity reserve study, any pending special assessment and its insurance premium line. In older buildings along the beach and downtown, those documents explain the monthly cost more than the listing price does.

Every price and price per square foot on this page is a median for all home types from the Redfin market page for that neighborhood, taken from Redfin's October 2026 page, which reports a three-month window ending September 2026 (Redfin, 3 months ending Sept 2026). The citywide Fort Lauderdale figure in the same window was a median of $605K, up 14.1% year over year, on 851 sales and 104 median days on market. Medians describe what sold in that window, not what a specific home is worth, and a neighborhood with eight or ten closings can move double digits on a single sale.

School ratings are GreatSchools ratings as published on the Redfin page for each area and describe the school, not the assignment. Confirm the assigned school for an exact address with the local school district. Flood percentages are First Street projections over 30 years, not FEMA zone designations, so check the FEMA flood map for the address as well. Market figures are medians from third-party public sources for the periods shown and do not represent the value of any specific property. Information is deemed reliable but not guaranteed. This guide is general information, not legal, tax or insurance advice. Miguel Perez is a REALTOR® with Luxe Properties, Florida license SL3515849. Equal Housing Opportunity.
